Information Technology
355 Portage Avenue
Winnipeg, MB
Fall 2018 Co-op Opportunity**

Company Summary

Putting the customer at the centre of everything we do is essential to providing a high-quality and consistent customer experience across our network of more than 1,700 retail and gasoline outlets. Through our cutting edge store design, digital marketing, e-commerce and the use of leading-edge customer analytics, award winning call centre and state of the art distribution centres, Canadian Tire is continually evolving so we are better able to respond to the changing expectations of consumers.

For our employees, this means working in a dynamic environment that champions and invests in innovation. At Canadian Tire, strong leadership and a talented team are our greatest assets. We are a successful and growing company that values diversity and innovative thinking, and fosters a culture of performance and accountability. Canadian Tire's family of businesses gives employees the opportunity to explore career paths across our many brands. In our retail stores and gas outlets, and at our corporate head offices across the country, our employees are passionate and committed to helping us build our reputation as one of the best places to work in Canada.

Position Summary

Work with state of the art tools and highly skilled cyber security specialists to maintain a proactive approach to protecting the brand from cyber criminals / malware / exploits and vulnerabilities

Responsibilities

- Conduct log analysis, network forensics, host forensics, malware analysis and triage in support of incident response investigations.
- Define relationships between seemingly unrelated events through deductive reasoning.
- Come up with new suggestions to do things faster, better and more effectively while maintaining a laser focus on quality.
- Be honest, transparent and genuine with your peers.
- Protect the brand

Qualifications

- Active second year or above enrolment in a Computer Science, Technology or Information Security related program.
- Enjoy the challenge of solving complex technology puzzles while being able to present the results simplistically.
- Strong understanding of computer science, or quantitative and/or qualitative analytical methods.
- Very strong written and verbal communication skills.
- Passion for a career in Cyber Security.
- Knowledge of Information Security will be an asset.

This position is subject to the successful completion of the following Pre-employment conditions:

- **Reference Checks**
- **Criminal Background Checks**

Canadian Tire is an equal opportunity employer. We are committed to a diverse and inclusive workplace for all. We recognize that our future success depends on the perspectives and contributions of all our employees -- their diverse backgrounds, abilities and experiences make our business stronger. If you are contacted for a job opportunity, please advise us of any accommodations needed to ensure fair and equitable access throughout the recruitment and selection process. All accommodation information provided will be treated as confidential and used only for the purpose of providing an accessible candidate experience.
